Article Assignment 1  
Mr. Moy

**Directions:** You will be responsible for researching a specific topic in the overall category of *Medical Science* (eg. Cardiology, pathology, drug interactions, etc.). Specifically you will need to find a topic that has had research done with experiments, drug trials, etc.

You must summarize this article using MLA formatting and must include the following:

- Background on the topic
- The initial hypothesis or problem that was being investigated
- Any and all data and analysis made by the individual(s) conducting the research.
- Any importance, current uses or future uses.

You may use this sheet to help organize your thoughts. Otherwise all other work should be done in your research notebooks. [The class website, [dmoyryeneck.weebly.com](http://dmoyryeneck.weebly.com), has links to useful websites to help aid in your search of a topic and/or to gather several sources to help explain a topic]
